More than 40 years serving the local market, our expertise and craftsmanship have been developed into one of a kind, offering exceptional products and services to our loyal clients.

Whether a new or existing project, Tadmur Roofs & Pools delivers an extensive range of services and project management starting from waterproofing, industrial coatings and anti-carbonation, concrete repairing, façade decorations to elite designs and execution of luxurious swimming pools and SPAs. Sustainability, durability and environmental friendly practices are among our top primacies.

Tadmur Roof and Pools offers smart and precise solutions that last. Our highly specialized team of engineers along with our range of exclusive products enables the reliability and the excellence needed in our line of business. Being a loyal partner with professional after sales service support and maintenance, to keep our clients satisfied and confident.

GENERAL MANAGER MESSAGE

With a legacy dating back to 1977, Tadmur has remained at the forefront of Qatar's roofing and waterproofing industry. Our involvement in iconic projects such as the Doha Sheraton, Hamad Hospital, and Qatar Foundation has solidified our position in the market. As Qatar has undergone significant expansion and transformation, driven by visionary leaders, Tadmur has played a pivotal role in shaping its global image. Our steadfast commitment to trustworthiness has earned our clients' confidence, who value our timely delivery of high-quality work and comprehensive post-sales services. With a skilled and resourceful team, we take pride in our expertise and unwavering dedication to completing projects to the highest standards. We also complete projects within designated timelines.

Our multinational workforce comprises highly skilled professionals who continually monitor and maintain our resources' health, safety, and quality. In 1996, Tadmur Roofs and Pools executed notable projects that marked a turning point for Qatar's construction industry. Today, we once again find ourselves in the limelight, contributing to prominent ventures such as the New Doha International Airport (NDIA), Bawa Commercial Avenue, Qatar Foundation, Qatar University, and the Petrochemical Industry. Since our humble beginnings in 1985, we have tackled challenges head-on, fulfilling our promises to our clients. We remain committed to excelling in our performance and rising to the challenges presented by "VISION QATAR 2030".

MR. NABIL RAJEH HALAWA
GENERAL MANAGER

OUR MISSION

We aim to serve Qatar's growth, guided by a steadfast commitment to the community. Rooted in a philosophy of ethics, we prioritize safety as a foundation for profitability, forging a path that harmoniously integrates progress with well-being.

OUR VISION

Eagerly embracing Qatar's vision for 2030, we persistently push the boundaries of sustainability and climate responsibility, introducing innovative products that position our customers at the forefront of progress.

WE ARE BUILT ON TRUST

Our clients choose us for the highest quality work, from delivery to post-sale services. We pride ourselves on our skills, resources, and expertise.

WE ARE BUILDING HISTORY

We've delivered projects for an affordable housing development at Salwa Road, the Salwa Beach resort project, and at Hamad International Airport. From stadiums to shopping malls to private villas, our highly specialized team leaves behind only the best.

WE ONLY DEAL IN QUALITY

We're high-performing because we focus on delivering quality in every single area we handle, from our teams to our customers.

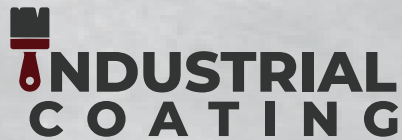

THE RANGE OF OUR SPECIALIZATIONS

We specialize in delivering top-notch waterproofing services, safeguarding your investments and providing lasting peace of mind against water-related concerns.

With our expertise in exterior insulation and finish systems, we deliver efficient and visually striking solutions that enhance energy efficiency, durability, and the overall aesthetic appearance of your building.

Our industrial coating division delivers advanced solutions for durable and protective coating. Enhance functionality and aesthetics with our trusted solutions.

The power of transformation with our comprehensive refurbishment services. From a tiny repair to complete renovations, our company specializes in revitalizing spaces to bring out their full potential.

Expert Concrete Repair: Revitalize structures, fix cracks, and restore integrity. Trust us for reliable, durable solutions.

Our pools division combines the art of landscaping with the indulgence of sauna and steam, crafting exquisite outdoor spaces that invite relaxation and elevate your lifestyle.

WATERPROOFING

SEAL YOUR WORRIES AWAY WITH OUR TRUSTED WATERPROOFING SOLUTIONS

SUBSTRUCTURE WATERPROOFING

Substructure waterproofing material is depending on the type of foundation always. If it's isolated footings, then the material can be torch-applied SBS Bituminous membrane from BMI Group-Siplast, France such as; PARAFOR M4S, TERANAP JS, etc...

If the foundation is Raft.

Bonded system - two layers of SBS Bituminous modified SBS membrane from BMI Group-Siplast, France and Fully bonded membrane waterproofing system from SIKA Waterproofing
Unbonded system – SBS Geo-membrane from BMI Group-Siplast, France, PVC membrane from SIKA, Elastoseal EPDM membrane from SealEco, Sweden.

SUPERSTRUCTURE WATERPROOFING

Superstructure waterproofing (Roofs, balconies, Planters, etc.) – for roof waterproofing, we can apply Either SBS bituminous Waterproofing membrane such as Parafor M4S & Parafor 30GS from BMI group or APP Membrane such as Paraplast 4S & Paraplast GS from BMI group. It can be also a TPO membrane such as Monarplan from BMI group or EPDM from SealEco such as Prelasti Roofing or a Hot Melt system Such as Henry HM system from Henry Co or Cold Fluid applied Polyurea/Polyurethane Waterproofing system from SIKA.

Scope of work:
• Substructure & Superstructure Waterproofing

TRANSFORMING BUILDINGS WITH STYLE AND PERFORMANCE

EIFS INTRODUCTION

Exterior Insulation and Finish System, is a composite building cladding system that offers both insulation and a water-resistant finished surface to exterior walls. It is a non-load bearing system that integrates insulation and a protective layer in one. Typically, EIFS is attached to the outside face of walls using adhesive or mechanical fasteners. Adhesives are commonly used to secure the system to various substrates like gypsum board, cement board, or concrete. With its insulation properties and durable surface, EIFS enhances energy efficiency and weather resistance while providing a seamless and visually appealing finish to buildings. Architects and builders often choose EIFS for its efficient, reliable, and aesthetically pleasing characteristics in a single integrated solution.

Industrial Manufacturer: BASF Construction Solution/Gulf Additive Factory.

REFURBISHMENT

UNLEASH THE POTENTIAL OF YOUR SPACE WITH REFURBISHMENT EXCELLENCE

REFURBISHMENT INTRODUCTION

Refurbishment is the art of breathing new life into existing spaces. It involves revitalizing and transforming properties to meet modern standards, enhance functionality, and elevate aesthetics. From minor updates like repainting and replacing fixtures to complete renovations that encompass structural modifications, refurbishment offers a cost-effective and sustainable solution to enhance the value and appeal of properties. With careful planning, expert craftsmanship, and attention to detail, refurbishment projects can unleash the hidden potential of spaces, creating environments that are both functional and visually captivating.
